

The Belmont Hill Club

An addition and re-invention of a 1960's era clubhouse

Jonathan Levi Architects was retained by this tennis/swim club to overview their facility needs and provide solutions which would expand the club's amenities and update the comfort and atmosphere of the aging clubhouse and grounds. The existing steel frame and paneled structure was renovated and added to providing new living hall, kitchen, locker, exercise facility and summer camp/school facilities.

Features

- Economic metal panel construction
- Utilization of required new roof areas
- Plan incorporated views to extensive landscape
- Architect's interior appointments integrated with overall design

Recognition

- 2000 Award for Design Excellence – Honor Award, Boston Society of Architects/AIA
- "The Year in Review Issue", *ArchitectureBoston*, 2000
- *Harvard Design Magazine*, Fall 1999

The new exercise room facility was created to maximize views to the adjoining pool deck and landscaped grounds. Its roof, with adjoining new deck, was developed with comfortable redwood deck surfaces as an outdoor living area.

Program

The aesthetic of the existing metal system was built upon through new additions in crisp white painted steel. The addition was made usable both inside and out through development of the new roof areas as exterior lounge decks extending the space of the existing second floor clubhouse interiors.

Jonathan Levi Architects provided full interior design services, selecting all fabrics, finishes and furnishings.
